

liquid crystal polyester resin A, 224°C in the case of a liquid crystal polyester resin B, 232°C in the case of a liquid crystal polyester resin C, 243°C in the case of a liquid crystal polyester resin D, 204°C in the case of a liquid crystal polyester resin E, 221°C in the case of a liquid crystal polyester resin F, 239°C in the case of a liquid crystal polyester resin G, 255°C in the case of a liquid crystal polyester resin H and 288°C in the case of a liquid crystal polyester resin I.

In the claims:

Please add the new claim as follows:

—9. A thermoplastic resin composition comprising 5 to 50 parts by weight of a liquid crystal polyester resin containing a structural unit (2) containing the following structural formulae (A₁), (B₁), (B₂) and (C₁), and having a flow initiation temperature of 260°C or less, and 100 parts by weight of a thermoplastic resin having a deflection temperature under load of less than 190°C, wherein Formula (A₁) is represented by

Formula (B₁) is represented by
